Who We Are.

We are a Cyber Risk and Security Solution company. We stand as a trusted leader in Africa's cybersecurity market, committed to safeguarding organizations against cyber threats and digital frauds. With over a decade of proven expertise, we have built a reputation for delivering trusted end-to-end protection that empowers businesses to thrive with confidence.

Our strength lies in working with organizations to adopt cyber risk thinking in their business objectives while implementing best practises with the right technology and cost in their IT risk management journey that leads to maturity and continuous improvement. We are skilled in helping organisations build resilience while positioning them for sustainable growth.

To deepen this impact is our Innovation Center which drives advanced research, security intelligence, and solution development focused on emerging and evolving threats. The centre enables proactive security advancements through continuous research, studies and reports, analysis, testing, and thought leadership ensuring our solutions and team remain adaptive, future-ready, and aligned with the realities of Africa's digital and business environments.

We deliver our services through three business units, which are:

Cyber Defence

- ✓ Cyber Risk Management Advisory Services

App Dev

Aquila

<https://www.aquilasec.io/>

Ethnos has developed the following applications:

Aquila is a purpose-built mobile application security platform designed to help organizations secure, protect, and monitor mobile apps throughout their lifecycle. It combines advanced security testing, in-app protection mechanisms, and actionable threat intelligence to safeguard Android and iOS applications against vulnerabilities, tampering, data leakage, and evolving mobile threats at scale.

Castellum

<https://www.mycastellum.com/>

Castellum is a custom-built Human Cyber-Risk Management Platform that assesses, measures and protects from the cyber risks associated with the humans of any organization designed to help organizations strengthen their human security layer by turning employees into the first line of defense. It delivers targeted training, realistic threat simulations, and actionable insights to reduce human risk, improve security behavior, and build a resilient security culture across the organization.

Our Clients

Built on trust and long-term partnerships, our work spans multiple industries and continues to expand. Some of our clients include:

Our Partners

We maintain strong partnerships with 30+ global OEMs and solution providers, including:
